

# BT-Cath<sup>®</sup>

Balloon Tamponade Catheter for  
Postpartum Hemorrhage

*Simple & Timely When it's Needed Most.*

Catalog No. BTC-100

BT-Cath<sup>®</sup>

**BT-Cath's soft silicone balloon material**  
contours to the internal uterine shape.

The intrauterine drainage port is flush with the top of the  
balloon allowing **placement near the fundus.**

Several design components  
facilitate **timely balloon inflation.**

# BT-Cath®

with **EasyFill™** Inflation System (Catalog No. BTC-ESY)

- Single-person, simplified operation.
- Allows inflation directly from the fluid bag.
- Creates a closed system.

**1. Spike** a 500 mL bag of fluid.

**2. Prime the tubing** by attaching the syringe and drawing fluid through the tubing.

**3. Inflate** by connecting EasyFill™ to BT-Cath and pushing fluid into the balloon.
